

Cut Downtime! Call today for your annual preventative maintenance

Are you running your dictation, transcription, or recording system until it breaks?

Many people will change the oil in their car every 3,000 miles (about 50 hours of operation at 60 mph), but **don't think twice about running a critical system nearly 9,000 hours a year without a checkup.**

Annual inspections are included with our maintenance plan, and are now being offered to off-service customers as well.

Call today to see how we can help reduce downtime for your system!

Comprehensive Annual Inspection

Our inspection includes more than 15 checks that are specifically designed to help reduce downtime including:

- ✓ Update all software
- ✓ Clean and inspect all hardware
- ✓ Test all functionality
- ✓ Review service history
